INDEX.

ABALONES OF CALIFORNIA, THE, 335
Absorption of homogeneous β rays, 184
——, Relation between β-ray wave-lengths and, 119
Acids, Properties of naphthenic, 53
Acmite, Aegirine and, 20
Adaptation of stomach of open-bill, 185
Adams, Professor W. Grylls, 184
Adjustment, The microscope fine, 331
Adsorption, 245
Aegirine and acmite, 20
Aeolian harp, The, 155
Agriculture, The war and, 232
Alaskan earthquakes of 1899, The great, 168
Albinism and dominant whiteness, The cause of, 145
Alcohol for industrial purposes, 81
Algae, Minute structure of the blue-green, 273
——, To obtain the colouring matters of red, 12
Algol, 244
—— stars in space, The distribution of, 112
—— system, The, 207
Alpine lakes, Origin of, 329
Alps, Zonal lake-basins in the, 208
Altruism, Organic, 305
Aluminium salts, Physiological action of, 179
"Amentiferae," Relationships of, 328
Ammonia, Synthesis of, 328
Amphibious civet, 283
Andalusite in Cretaceous and Eocene sands, 330
Animal hypnosis, 58
Animalcules multiplying asexually, Long pedigree of slipper, 156
Animals, Iodine in marine, 216
Antarctic continent, Former connections of, 58
—— ——, Shape of the, 114
—— glacier types, 114
Anthrenus, Hairs of the larva of an, 153
Antennae of the Ichneumonidae, 22
Antiseptic clothing, 12
Ants, Black ants and white, 306
Apiocystis brauniana (Näg.), 277
Arran, Raised beach features in, 82
Astronomers, Great, 255
Astronomique, The Gazette, 297
Astronomy Notes, 15, 51, 78, 112, 146, 177, 206, 237, 272, 297, 327, 353
——, The amateur in, 11, 44
Atmospheric potential gradient, 21
Atomic weight, Electric-magnetic inertia and, 184
Australia, Chiastolite in South, 20
——, The summer of 1912 in, 242
Autumn, Nature study in the, 283

BACILLUS COLI, VITALITY OF, 240
Bacteria, Sulphur, 238
Badgeley, W. F., 359
Banana meal, Composition of, 299
Barclay, J. Gurney, 236
Barlow, E. G. B., 326
Barnard, J. E., 54, 83, 115
—— medal, The, 215
Beach features in Arran, Raised, 82
Beaver, The teeth of the wombat and the, 47
Benham, C. E., 341
Benzol from petroleum, Manufacture of, 208
Betelgeux, 354
Bickerton, Professor A. W., 201, 246, 261, 262, 317
Binaries, A study of eclipsing, 238
Biology of cowslip flowers, 179
—— —— *Fegatella*, 113
—— —— the larger British fungi, Some notes on the, 129, 161
Bird in a spider's web, A, 29
Birds, Memory of humming, 358
——, Number of British, 156
——, Pedigree of, 29
—— with female plumage, Male, 69
Blake, C. G., 313
Blind tactics, 156
Blood corpuscles, Sizes of red, 119
—— -sucking parasite of nestlings, 305
Blowpipe, The history of the, 229
Bodies by means of *x* rays, An improved method of localisation of foreign, 313
Body, The surfaces of the, 305
Bog in the tropics, A *Sphagnum*, 298
Boron and magnesium boride, Amorphous, 81
—— trichloride, 300
Botany Notes, 18, 51, 81, 112, 149, 179, 207, 238, 273, 298, 328
Bowell, The Rev. E. W., 153, 243
Box-stones, 241
Bradford, S. C., 70, 229
Breccia of English Midlands, Permo-Carboniferous, 53
Bridges, Selenium, 87
British Association, Radio-activity at the, 57
—— ——, Manchester, 1915, The conference of delegates of Corresponding Societies of the, 290, 346
—— —— meetings, 304
—— ——: Presidential address. Geology at the, 300
—— ——, Some presidential addresses at the, 310
—— coasts during 1914, Cetaceans on, 245
—— colour industry, The, 19
Brown on the Moon's motion, Professor E. W., 15
Bud-scales, Structure of, 81
Business, A grim, 283
Butterfly, A swallow-tailed, 326

CAITHNESS, CLIFF SCENERY OF, 180
California, The abalones of, 335
Captivity, Porpoises in, 29
Carbon dioxide as a fertiliser, 274
Cat, Hair of, 29
Caterpillar, Myrmecophilous organs in a, 88
Caterpillars' setae, 58
Cavers, Professor F., 18, 51, 81, 112, 149, 179, 207, 238, 273, 298, 328
Cells, A dark-ground illumination study of plant, 52
——, Independence of, 306
——, Selenium, 87
Celluloid and its use, 331
—— in photography, Use of, 332
Cetaceans on British Coasts during 1914, 245
Chaetae, Families of the polychaeta recognisable by their possessing characteristic, 211
Chamberlin's planetesimal hypothesis, Moulton and, 51, 78
Chambers Mr. G. F., 238
Charts, The United States pilot, 275
Chatley, Professor Herbert, 225
Cheavin, W. Harold S., 25
Chemical changes in geotropism, 81
—— organisation in Germany, 208
Chemistry Notes, 18, 52, 81, 113, 150, 179, 207, 239, 274, 299, 328, 354
Chiastolite in South Australia, 20

684008

JUN 21 '39 U OF M BINDERY

XUM

Chicago, Great ranges of temperature at, 276
Chlorophyll, Constitution of, 18
Chromatic reflection, A singular case of, 333
Chromosomes in plant nuclei, Individuality of the, 112
Cinematography, Weather forecasts by, 83
Civet, Amphibious, 283
Clare Island, 20
Claremont, Leopold, 1
Clay, The origin of, 151
Cliff scenery of Caithness, 180
Climate and its cause, The change of, 220, 230
——, Man and, 210
Clothing, Antiseptic, 12
Cloud-forms in Egypt, Frequencies of, 209
Clouds, Photographing, 278
Coal-pit at great depths, Fauna of, 29
——, Plant constituents of, 299
——, The origin of, 179
——, The origin of the bright and dull laminae of, 114
Cobalt paper, Transpiration studies with, 179
Cockatoos, Curious habit of, 29
——, Hybrid, 120
Cockroach, Memory of, 156
Collodio-chloride paper, Prints upon matt-surface, 212
—— - —— prints, Variations in the methods of toning matt, 243
Colloidal graphite, 303
Comet and the planet Uranus, Tempel's, 178
——, Mellish's, 112, 146, 177
Comets, 327
Commerce among the Eskimo, 151
Condenser, The Moscicki, 303
Condensers, Focal length of substage, 276
Conductivity with fusion, The change of thermal, 215
Copper, Specific heat of, 215
Coral reefs, Origin of, 274
Corals at great depths, 185
Cornish coast, Mirage on the, 152
Corpuscles, Sizes of red blood, 119
Correspondence, 12, 37, 198, 230, 236, 261, 307, 326, 335, 359
Corrigendum, 25
Corundum, 275
Cowslip flowers, Biology of, 179
Cox, Thos. N., 302
Crabs, Species of ro-body, 216
Crawford John (Lanarkshire), The Essexite of, 330
Creosote in preserved timber, Character of, 150
Cretaceous and Eocene sands, Andalusite in, 330
Crinoids and echinoderms, Composition of the hard parts of, 275
Crocodile's nest, 119
Crommelin, A. C. D., 14, 15, 47, 51, 78, 90, 112, 121, 146, 157, 177, 187, 206, 217, 237, 250, 270, 272, 297, 308, 327, 336, 351, 353
Croydon district, Rainfall in the, 355
Crystalline structure, Details of, 27
Crystals in igneous magmas, Sinking of, 180
——, Selenium, 87
Curlewis, H. B., 38
Cuttlefish, Gigantic, 88
Cyclones and anticyclones, 152
——, The mechanism of, 355
Cyprus, Common insects and spiders in, 267
DALMATIA, PSEUDO-GLACIAL FEATURES IN, 354
Damania, P. J., 12
Danish waters in former and present times, State of the ice in, 181
Dark-ground illumination study of plant cells, A, 52
Darwin's alternative, 307
Davidson, The Rev. M., 220
Davison, Charles, 168
Débris by running water, Transportation of, 151
De Castro's Red Sea log, 334
Delta Orionis, The orbit of, 51
Dennett, Frank C., 6, 43, 89, 111, 125, 144, 186, 197, 249
Denning, W. F., 11, 44, 198, 236, 255
Deposit, Thorium active, 118
Deposits, Formation of active, 57
Developer, Employing used ferrous oxalate, 154
Diathermy, 56
Dinosaurs not a natural order, 29
Disintegration series, New work on the, 118
Door to choice, Unlocking the, 334
Dragon-fly, The, 22
Drift of the Durham coast, Scandinavian, 329
Durham coast, Scandinavian drift of the, 329
Dust, 103
Dye, Khaki, 141
Dynamics of the stellar universe, The, 206
EARTH AND THE MOON, THE INTERNAL STRUCTURE OF THE, 273
Earthquakes, British, 354
—— of 1899, The great Alaskan, 168
Earth's crust, Thorium content of the, 155
Echinoderms, Composition of the hard parts of crinoids and, 275
Eclipse of last August, The solar, 149
—— of 1916 (February), The total solar, 353
Eclipses, Future total, 16
Eclipsing binaries, A study of, 238
Ectoparasite of freshwater jelly-fishes, 245
Eels above Niagara Falls, 245
Eggs, Insects', 242
Egypt, Frequencies of cloud-forms in, 209
Eikonogen, Development with, 116
Electric discharge on plants, Effects of, 51
—— -magnetic inertia and atomic weight, 184
—— spark, The, 332
Electrical precipitation, 303
Electricity, Frictional, 118
—— through metals, Conduction of, 279
Electrostatic field on spectra, The effect of an, 357
Elements, The question of isotopic, 185
England and Wales, Relative humidity in, 54
Eocene sands, Andalusite in Cretaceous and, 330
Equisetum, Prothallus of, 18
Eskimo, Commerce among the, 151
Essexite of Crawford John (Lanarkshire), The, 330
Étalon interferometer, The, 56
Euglenoids in water supply, Practical importance of, 305
Eurasian mountains, Classification of, 240
Europe, The Geographical Society map of, 274
Eutectics, 285
Exploration in the Karakoram, 329
FABRY AND PÉROT'S INTERFEROMETER, 56
—— —— —— ——, Applications of, 56
Fauna of coal-pit at great depths, 29
Faunas, Shore, 59
Fegatella, Biology of, 113
Ferns as microscopic objects, 301
Ferrous oxalate developer, Employing used, 154
Fertilisation, Ultra-violet rays and artificial, 303
Fertiliser, Carbon dioxide as a, 274
Films, Non-inflammable, 332
Filters, Light, 115
Fire-fly, Photogenic substances in the, 180
Fish, New apodous, 185
Fishes, Frequency of parasites in, 58
Flata, The extraordinary case of, 88
Fleas and rat-trypanosomes, Rat-, 334
Fleck, Alexander, 28, 57, 88, 118, 155, 184, 215, 245, 279, 303, 333, 358
Flints, The making of gun, 106
Flora Selborniensis, 12, 38, 69
Flower table and its educational value, The, 294
Flowers and their insect visitors, 358
—— as indicators, Colours of, 150
——, Biology of cowslip, 179
Fluorescence produced by ultra-Schumann rays, 333
Fluorine in mineral waters, 113
Fluor-spar, The phosphorescence of, 179
Fog with oil, Preventing, 330
Fogs, Manchester, 242
Fortuitous, The reduction of the, 216
Fossils, Skiagraphs of, 334
Fremantle, High Tides at, 37
Frog, Sex recognition in wood, 59
Frogs and toads, Voices and songs of, 306
Front, A zoölogist at the, 156
Fungi, Decomposition of wood by, 274
—— detergent ? Are, 307
——, Some notes on the biology of the larger British, 129, 161
Fungus *Sporodinia grandis*, Conjugation in the mould-, 207
Fusion, The change of thermal conductivity with, 215
Freshwater jelly-fishes, Ectoparasite of, 245
—— mussels, Propagation of, 305
GARNETT, HENRY, 232
Gas, a new method of counting the molecules of a, 118
Gases, Crude nitrogen in natural, 82
——, The German poison, 239
Gastrolith from a moose, 156
Gazette Astronomique, The, 297
Gegenschein, The, 359
Gelatine film, The elimination of the soluble salts and "hypo" from the, 55
Gelatine negatives, Varnish for, 278
Geographical research, The importance of, 300
—— Society map of Europe, The, 274

Geography and strategy, 53
——, Maps and physical, 53
—— Notes, 19, 53, 82, 113, 150, 180, 208, 240, 274, 300, 329, 354
——, Statistical methods in plant, 52
Geology at the British Association: Presidential Address, 300
—— Notes, 20, 53, 82, 114, 151, 180, 209, 241, 275, 300, 329, 354
——, Radio-activity and, 215, 304
Geotropism, Chemical changes in, 81
German poison gases, The, 239
—— Science, 142
Germany, Chemical organisation in, 208
Germany's motor fuel, 53
Glacial features in Dalmatia, Pseudo-, 354
Glaciation of North Japan, 180
—— of Strath Spey, 209
Glacier types, Antarctic, 114
Glass of the Middle Ages, Coloured, 239
——, Quartz, 118
—— research, 208
Glow-worm, Giant, 358
—— larvae, Feeding of, 216
Gorges, Interglacial, 150
Graphite, Colloidal, 303
Gravitation, The graphics of, 201, 246, 262, 317
Grove, W. B., 12, 120
Gulf Stream, The, 114
Gulls, Movement of the black-headed, 280
Gun-firing in the North Sea, Audibility of, 181
Gun flints, The making of, 106
Gyroscopic atomic model, 88

HAIR OF CAT, 29
Hair pigment, On the formation of, 101
Hairs, Numbering, 58
—— on rock-plants, On the, 259
—— of the larva of an *Anthrenus*, 153
Hanson, D., 285
Harp, The Aeolian, 155
Hastings, Somerville, 129, 161
Haughton, J. L., 285
Heat of copper, Specific, 215
——, The electrification of surfaces as affected by, 184
Heavens, Possible obscure patches in the, 177
Henslow, George, 307
Herb Robert, Pollination of, 18
Horwood, A. R., 294
Humidity in England and Wales, Relative, 54
Hutton, E. Ardron, 331
Hybrid, A new graft, 18
—— cockatoos, 120
Hydrogen, α Rays in, 358
Hypnosis, Animal, 58
"Hypo" from the gelatine film, The elimination of the soluble salts and, 55
Hypothesis, Moulton and Chamberlin's planetesimal, 51, 78
—— of Novae, The collision, 149

IBEX, AN ISHMAELITE, 155
Ice in Danish waters in former and present times, State of the, 181
Ichneumonidae, Antennae of the, 22
Igneous magmas, Sinking of crystals in, 180
Illumination study of plant cells, A dark-ground, 52
Individuality in detail, 283
Indo-Gangetic trough, The, 240
Industry, Misdirected, 185
——, The British colour, 19
——, —— hardened oils, 19
——, —— history of the Scottish shale oil, 70
Inertia and atomic weight, Electro-magnetic, 184
Infusorian, The man-of-war, 58
Insect visitors, Flowers and their, 358
Insects and spiders in Cyprus, Common, 267
——, Smell in, 216
Insects' eggs, 242
—— lancets, 210
Interferometer, Applications of Fabry and Pérot's, 56
——, Fabry and Pérot's, 56
——, The Étalon, 56
Invar, The discoverer of, 183
Iodine in marine animals, 216
Ionium, Period of, 304
Ishmaelite Ibex, An, 155
Isolated parts, Life of, 306
Isomeric rainfall maps, 209
Isotopic elements, The question of, 185
Ixodoidea (Banks), 219

JAMAICA, JUNE, 1915, HEAVY RAINFALL IN, 330
Japan, Glaciation of North, 180
Japanese maidenhair tree, The, 236
Jelly-fishes, Companions of, 120
——, Ectoparasite of freshwater, 245
——, Stings in, 119
Jupiter, The ninth satellite of, 178
——, The planet, 353

KAMES, ORIGIN OF, 329
Karakoram, Exploration in the, 329
Kathode rays, Salts coloured by, 87
Keegan, P.Q., 324
Kelp, Potash from, 299
Khaki dye, 141
"Kinetol" and "Thermatol," 261
Knaggs, A. B., 236

LAKE-BASINS IN THE ALPS, ZONAL, 208
Lakes, *Mysis relicta* in the great, 280
——, Origin of alpine, 329
Lambert, Rev. F. C., 277
Laminae of coal, The origin of the bright and dull, 114
Lancets, Insects', 210
Lantern slides and transparencies, Blue-toned, 278
Larks singing at night, 245
Larva of an *Anthrenus*, Hairs of the, 153
Larvae, Feeding of glow-worm, 216
Lavas, Origin of pillow structure in, 241
Lead, An allotropic modification of, 354
—— from uranium ores, 333
—— of radio-active origin, The spectrum of, 184
—— paints, Report on white, 240
Leigh-Sharpe, W. Harold, 211
Lens, Ascertaining the focal length of a, 303
Lenses, Long- versus short-focus, 302
Letchworth Museum, 12
Lice, Destruction of, 280
Life, Prolongation of, 358
Light-filters, 115
Light in microscopy, Sources of, 243
—— of Neptune, Variation in the, 273
—— on respiration, Influence of, 298
——, Very short-waved ultra-violet, 117
Limpets, Journeys of, 29
Linnean Society, The, 11
Log, De Castro's Red Sea, 334
Longitude of the planets, An easy method of finding the approximate, 225

MACDONALD, A., 307
Magmas, Sinking of crystals in igneous, 180
Magnesium boride, Amorphous boron and, 81
Magnetic particle, The nature of the ultimate, 184
Magnetisation by rotation, 357
Maidenhair tree, The Japanese, 236
Mammal in the Palaearctic region, The smallest, 280
Man and climate, 210
Manchester fogs, 242
Map of Europe, The Geographical Society, 274
Maps and physical geography, 53
——, Isomeric rainfall, 209
Marriott, R. A., 232
——, Wm., 20, 53, 83, 114, 152, 181, 209, 241, 275, 300, 330, 355
Mars, 75, 238
——, The rotation period of, 298
Matt collodio-chloride prints, Variations in the methods of toning, 243
Matter, Passage of β particles through, 333
Maxwell, J. E., 75
Medal, The Barnard, 215
Mediaeval sealing wax, 18
Medical uses for radium, 57
Medicines, Report on patent, 180
Mellish's Comet, 112, 146, 177
Melotte's catalogue of star-clusters, Mr., 298
Metabisulphite, Potassium, 183
Metabisulphites, Sulphites and, 183
Mercury and occultation of Pleiades, Transit of, 18
Metal *x*-ray tube, A safe, 333
Metals, Conduction of electricity through, 279
——, The colour of, 113
—— used in shell manufacture, 299
Meteor, Bright, 236
—— orbits, 78
Meteorology Notes, 20, 53, 83, 114, 152, 181, 209, 241, 275, 300, 330, 355
—— of the Sun, 242
——, Totland Bay, 301
Meteorological phenomena, Discontinuities in, 330
Meteors, June, 198
——, The August, 236
Micro-organisms and the war, 83
Microscope and the war, The, 54
—— fine adjustment, The, 331
——, The care of a, 55

XUM

Microscopic objects, Ferns as, 301
Microscopical Club, The Quekett, 25, 55, 115, 153, 182, 212, 243
—— Magnification, The limits of, 26
Microscopy Notes, 22, 54, 83, 115, 152, 182, 210, 242, 276, 301, 331, 355
——, Sources of light in, 243
Military areas, Water supply in, 83
Milk, Clean, 348
Minerals, Ratio of uranium to radium in, 28
Mirage on the Cornish coast, 152
Mistletoe on the oak, 172
Mitchell, C. Ainsworth, 18, 52, 81, 113, 150, 179, 207, 239, 274, 299, 328, 354
Mites, Shore, 58
Molecules of a gas, A new method of counting the, 118
—— The relative dimensions of, 215
Monaco Museum, 216
Moon, Photographs of the, 199
——, The internal structure of the Earth and the, 273
Moon's motion, Professor E. W. Brown on the, 15
Moose, Gastrolith from a, 156
Moscicki condenser, The, 303
Moseley, The late Second Lieutenant, 303
Moss *Tetraphis pellucida*, Protonema of the, 207
Motion, Faint star with large proper, 353
——, Perpetual, 341
Motor fuel, Germany's, 53
Moult, effect of postponed, 30
Moulton and Chamberlin's planetesimal hypothesis, 51, 78
Mount Wilson Solar Observatory, 237
Mountains, Classification of Eurasian, 240
Mouthed, Soft-mouthed and hard-, 306
Mud-lumps, 19
Museum, Letchworth, 12
—— Monaco, 216
Mussels, Propagation of freshwater, 305
Myrmecophilous organs in a caterpillar, 88
—— plants, 207
Mysis relicta in the great lakes, 280
Myxomycete, Number of spores in a, 120

NAPHTHENIC ACIDS, PROPERTIES OF, 53
Nature study in autumn, 280, 283
Nebula, Application of interference to the study of the Orion, 28
Negatives from black and white originals, Making, 84
—— ready for printing, Making, 154
——, varnish for gelatine, 278
Nelson, Edward M., 356
Nematode worms, Habitats of, 89
Neptune, Variation in the light of, 273
Nestlings, Blood-sucking parasite of, 305
Newts, Colour-change of, 120
Niagara Falls, Eels above, 245
Nicotine from waste tobacco leaves, 82
Nitrogen, An oxidisable variety of, 113
—— in natural gases, Crude, 82
North Sea, Audibility of gun-firing in the, 181
Notes, 15, 51, 78, 112, 146, 177, 206, 237, 272, 297, 327 353
——, "Wolf," 333
Notices, 32, 64, 96, 128, 160, 192, 224, 254, 284, 312, 340, 360
Novae, Late spectra of, 146
——, The collision hypothesis of, 149
Nuclei, Individuality of the chromosomes in plant, 112

OAK, MISTLETOE ON THE, 172
Obituary, 238
Observations in 1914, Phenological, 301
Observatory, Greenwich, Royal, 210
——, Mount Wilson Solar, 237
——, Stonyhurst College, 125
Oil industry, The history of the Scottish shale, 70
——, Preventing fog with, 330
Oils industry, The hardened, 19
Onslow, H., 101, 145
Onychophora, Distribution of, 334
